

SEARCHING THE DATABASE OF TIPS AND TOOLS FOR STRATEGIC INVOLVEMENT

You can search the database of tips and tools by location, the type of materials available, and the source of the tip or tool. The fewer fields you select, the broader your search results will be.

Please note that choosing more than one field in each category (e.g. searching by both Alabama and Arkansas) will limit the search field to snapshots tagged with both fields (e.g. a fact sheet on the American Diploma Project, of which both Alabama and Arkansas are members, but not a state fact sheet on Alabama's education data). While some tips and tools are relevant to multiple states and may be categorized as various types of materials, for more robust results, we recommend choosing at most one field for each category.
